

Andrej Karpathy

I like to train deep neural nets on large datasets 🧠 🤖 ⚡

2024 -

I create educational videos on AI on my [YouTube channel](#). The videos come in two parallel tracks: a technical track and a general audience track.

1. Technical track: Follow the [Zero to Hero](#) playlist. General audience track:
2. [Deep Dive into LLMs like ChatGPT](#) is on under-the hood fundamentals of LLMs.
3. [How I use LLMs](#) is a more practical guide to examples of use in my own life.
4. [Intro to Large Language Models](#) is a third, parallel, video from a longer time ago.

For all the latest, I spend most of my time on [X/Twitter](#) or [GitHub](#).

2023 -
2024

I came back to [OpenAI](#) where I built a new team working on midtraining and synthetic data generation.

2017 -
2022

I was the [Director of AI at Tesla](#), where I led the computer vision team of [Tesla Autopilot](#) and (very briefly) [Tesla Optimus](#). My team handled all in-house data labeling, neural network training and deployment on Tesla's custom inference chip. Today, the Autopilot increases the safety and convenience of driving, but the team's goal is to make [Full Self-Driving](#) a reality at scale. See Aug 2021 [Tesla AI Day](#) for more.
